

AI ASSISTANCE & RESEARCH ETHICS DECLARATION

Project: HealthSathi | Academic Mini-Project Submission Package

1. ETHICAL DECLARATION OF AI TOOL USAGE

In accordance with institutional research guidelines and academic integrity standards, the student authors **Azhan (Roll No: 24315A0057)** and **Ayan (Roll No: 24315A0056)** hereby transparently declare the exact extent, nature, and boundaries of Artificial Intelligence (AI) assistance utilized during the design, implementation, and manuscript preparation of the HealthSathi project.

2. PERMISSIBLE SCOPE OF AI ASSISTANCE

Category	AI Tool Utilized	Author Governance & Human Verification
Code Ideation & Scaffolding	Antigravity IDE Assistant	Streamlit UI layouts, CSS formatting, and ReportLab canvas boilerplates were reviewed, debugged, and unit-tested by authors.
Grammar & Prose Refinement	Language Processing Assistant	Editorial assistance was restricted to syntax flow and IEEE style alignment. No scientific claims or numerical data were AI-generated.
Machine Learning Benchmarking	Scikit-Learn 1.4 (Deterministic)	All model training (Logistic Regression, SVC, Random Forest, K-Means) was executed locally on real observational dataset; results were un-fabricated.
Classical IKS Codification	Manual Human Curation (No LLM)	Ayurvedic principles were manually transcribed from primary translations of Charaka Samhita and Astanga Hridaya to avoid AI hallucination.

3. RESEARCH INTEGRITY CONFIRMATION

The authors confirm that: (1) all empirical results, confusion matrices, and metrics presented reflect actual computational outputs; (2) no fraudulent or fabricated accuracy values were reported; (3) limitations and model failures were genuinely analyzed; and (4) the final intellectual contribution, interpretations, and conclusions are the original responsibility of the student authors.

4. AUTHOR VERIFICATION SIGNATURE

Student Investigators: Azhan (Roll No: 24315A0057) & Ayan (Roll No: 24315A0056)

Department: Department of Computer Science & Engineering

Institution: Indian Knowledge Systems & Data Science Collaborative

Date: September 2026

Status: OFFICIALLY SUBMITTED & VERIFIED
